

Getting started

mUzima framework uses different tools and technologies to achieve its objectives. Before you delve into mUzima, how to install and use it, here is a snapshot of what you may need to know:

Mobile App:

- [Using an Android Smart Phone](#)
- Configuring android smart phone for [Internet connectivity](#)

Server Side:

- **Installing and configuring OpenMRS** (*only if it is your responsibility to do so*)
- [Administering modules](#) on OpenMRS (*only if it is your responsibility to do so*)
- [Creating cohorts](#) on OpenMRS
- Managing OpenMRS:
 - [Forms](#)
 - [Users and Providers](#)
 - [Complex Observations](#)
 - [Web Services](#) - RESTful API

Need more info:

To further understand the architecture of the mUzima framework, check out the [Technical Notes](#) section of this documentation

Are you an Implementer

Are you the system implementer- doing installations and configurations? Read the documentation.

1. [Installing mUzima](#)
2. [Configuring mUzima](#)
3. [Implementer's Guide](#) for OpenMRS

Are you an End User?

As a an end user, you will mostly interact with muzima mobile app or at times the mUzima modules on OpenMRS. Check out our guide:

1. [Using mUzima](#) guide
2. [Filling Forms](#) in mUzima
3. [OpenMRS User Guide](#)
