

# muzima

## Welcome to the mUzima Wiki!

This wiki is collection of documentation about mUzima software. It is a community generated and maintained with volunteer work going into sharing on information, knowledge and experiences. We encourage you to use the comments feature to enrich this documentation.

## Who are we:

**mUzima** is an open source, Android-based mHealth platform whose current version inter-operates seamlessly with OpenMRS. The Android app supports patient registration, data collection and upload, historical patient data access, cohorts management, patient search, form templates download, alerts and reminders, tele-consultation, and works both online and offline. At the server side, mUzima has modules to support forms management, form data processing, error resolution, and management of consultations.
